

US Decorative Multimedia

IKCOM's decorative 15-pin VGA/RGB feed thru wall plate and Display Port wall plate is used for linking a remote monitor/display. Additional four openings on the insert for IKCOM's Series I H.D. snap-in modules and Keystone Jacks provide most optimum usage on a single gang space.

Our HDMI Decorative jack allows user to terminate HDMI connector for in-wall connections. It has a 90 degree feed-thru internal connector and rotatable orientation design accepts HDMI cable drop from upward, upward as well as sideward to minimize cable bending.

The Audio/Video Wall Plate offer various choices of audio/video connection, which accommodate with one, two, three or four audio (RCA or banana) or video connectors. That helps you building actually what exactly required at the site.
