

US Flush Mount Wall Plate for Series II Snap-in Module

The Series II flush mount wall plates are designed to insert snap-in modules for different configuration of jacks and connectors for maximum installation flexibility. "Snap-in Module" comes in three sizes - 1/2" height, 1" height flat modules and 1-1/2" height 45 degree angled modules for bend radius protection of fiber and copper cabling. A single gang wall plate opening can accommodate three 1" flat module or two 1-1/2" angled modules. "Snap-in module" can be easily snapped out of the front of plate, so that changes can be made without removing the plate after installation. Write-on designation labels with clear plastic holders for system or station identification.
