

Dynamic Angled Blank Panel

IKCOM's patented Dynamic Angled Plank has Swivel Modules providing optimized patch cables routing. Cables can be routed to one end of Rack or both ends of Rack subject to cabling requirement. It provides the benefits of an Angled Panel to eliminated using of horizontal cable managements. The Dynamic Angled Blank Panel is ideal for both open rack and closet system. It accepts all IKCOM High Density Keystone Jacks, from Cat.5e to most updated Cat.6
